Describe your Drinking-Water System

The Corporation of the Town of Pelham operates a water distribution system which is supplied with treated water by the Regional Municipality of Niagara from the Welland Water Treatment Plant located at #4 Cross Street in Welland. The source of the water for the treatment plant is the Welland Recreational Waterway.

The treated water is transported to the Town by way of a 750mm diameter watermain to the Shoalts Drive Reservoir located at #5 Shoalts Drive in Fonthill. Water is distributed from the reservoir by way of a series of watermains and an elevated tank located at #177 Highway #20 West in Fonthill to lands within the designated service area.

The Pelham Distribution System is comprised of approximately 75.3 kilometers of watermains varying in size from 50mm to 400mm diameter. In addition there are 6.7 kilometers of 300mm diameter watermain owned by the Regional Municipality of Niagara which are connected to the Pelham Distribution System and also distribute water to lands within the service area.

List all water treatment chemicals used over this reporting period
